OK, I'll stay posted. I am planning to take every Monday and Thursday off, which is when I'll do OPP work.

Thanks,

Susan.

Thank you, Susan. I reached out to Jay and Julius to see what time might work on the 26th, but got conflicting time preferences. I might set up a doodle poll so that we could pick a reasonable date/time. Appreciate your patience.

Thank you,
Mitsuru

Monday the 26th would be ideal. I have a briefing for our AA at 9, so I am tentatively planning to take that whole day off from HHS activities. Please let me know if this will work for everyone else. If not, then we can just pick another day and I'll try to make myself available. I plan to stay involved in this activity as much as possible, but the detail is supposed to be pretty intense.

Thanks,

Susan.

No problem. How is your schedule the week of April 26th? Any time slot that might work for you?

Thanks,
Mitsuru

I'm sorry, but I can't make that day work with my schedule.

Susan.

Subject: RE: EPA-CDC Informal Triazole Fungicide Use Discussions

Thanks so much for the call today. We're very grateful for the collaborative approach.

As a follow-up, we wanted to see if Susan and Jay are available on Thursday, April 22nd at 3pm. Julius Fajardo at USDA is available at that time and it would be great if we could discuss the triazole fungicide issue further. If that time doesn't work, might there be other time slots that might work for you the following week?

Thank you,
Mitsuru

When: Monday, April 12, 2021 12:00 PM-1:00 PM (UTC-05:00) Eastern Time (US & Canada).
Where: Microsoft Teams Meeting

Thank you, all. Setting up a time for us to informally discuss topics around triazole fungicides. Attached is the embargoed copy of the manuscript for your information. Look forward to the discussion.

Here's a rough draft agenda for the meeting:

- Introductions
- Why CDC has become interested in agricultural triazoles
- Discussion of the paper
- Thoughts from Susan

- Ways forward to address the issue
- Possibility of a multistakeholder meeting

Thank you,
Mitsuru

Subject: RE: Reintroductions to Connect for Triazole Fungicide Use Discussions

Hi Susan,

That sounds like an excellent plan. I'd be happy to set up the informal meeting amongst this small group, and I'm happy to coordinate schedules. Would the next week or two work for you?

We don't have a firm date yet for publication, though from the editor's email, it seems likely in the next few weeks. We'd be glad to let you know when we hear more.

We really appreciate the chance to talk further with you!

Thanks,
Brendan

Subject: RE: Reintroductions to Connect for Triazole Fungicide Use Discussions

Hi Dawn, thank you for reintroducing us. We would be happy to continue collaborations into this area. Do you have a firm date on when the paper is expected to publish?

Brendan, I think a good first step would be for us to have an informal conversation about how CDC sees EPA responding to this issue. We can fill you in on our regulatory responsibilities and hear any potential steps that CDC thinks could be helpful.

At some point, it would be good for us to hold a fairly large meeting between the two agencies so that our scientists and managers have a chance to learn about the problem, impact on human health, and the human/ag interface. Lots of time for questions, answers and discussion.

Does this approach make sense to you? When would you like to have the informal meeting? I can check with Jay Garland to see if he would like to attend as well.

Thanks,

Susan Jennings

Subject: Reintroductions to Connect for Triazole Fungicide Use Discussions

Hi Susan,

I hope all is well with you. I know that you already know Tom Chiller and Brendan Jackson, who lead our mycotoxicology work here at the CDC. I wanted to use this email as a reconnecting opportunity, since the CDC triazole fungicide use paper, which you had the chance to review, will be published soon. We are interested in opening a dialogue with you and team around triazole fungicide use on crops/plants, to gain an understanding of your/EPA current thoughts on use of these pesticides and any plans for risk assessment from an AR perspective.

Brendan will be the main CDC point of contact for arrangement of these discussions, to ensure all the right CDC folks are included.

We hope that you will be interested to connect on this important topic, and with the potential to collaborate on addressing this critical AR issue.

Thank you,
Dawn
